

ESSENTIAL SOFTWARE FOR OIL AND GAS PROFESSIONALS

If you are looking for an integrated software solution, you have come to the right place. Divestco's extensive line of exploration software has been designed with a thorough understanding of the needs and demands of the land, geological, geophysical and engineering communities. We are constantly improving upon our solutions to help enhance the ease, efficiency and accuracy of your work.

Data Access, Analysis and Mapping Tools

GeoVista • Easy to use oil & gas data browser with extensive query capability and bundled data offerings.

GeoCarta • Instant browse, query and mapping capability for internal and external oil & gas datasets.

GeoCarta Tools • Oil & gas exploration and asset management tools using ESRI's ArcGIS, with unmatched capabilities connecting you to public, proprietary and third party datasets.

DataStore • Seismic data management and work order system.

EnerGISite • Access via web browser to digital and raster logs, as well as our scanned document library. EnerGISite access is also built directly into Divestco software.

Geophysical

WinPICS • Divestco's full featured, integrated seismic workstation with superior Stratigraphic and Structural interpretation capabilities.

EnvisionVSX • There is more to seismic than meets the eye! Revolutionary 3D visualization and interpretation utilizing Divestco's unique SeisScape™ terrain and lighting effects.

Synthetic Suite • Geophysical log modelling at it's best. Modelling from logs to seismic, integrated into your seismic interpretation workflow.

GeoWiz • Performs coordinate conversions and localized plotting. An expandable platform offering seismic and well database access, international conversions with bin and directional well mapping available.

VistaBridge • A rich set of WCSB data for your seismic workstation, including well ticket info, mineral rights, production, and land sales. No need to manually load public data ever again.

Geological

CrossLog Suite • Three integrated tools for picking correlations and building cross-sections from digitized vector and raster logs.

EarthVision • Integrate geology, seismic, structure, well geometry and rock properties to produce accurate, reservoir simulator ready earth models.

Land

LandRite • Comprehensive proprietary land management system built on standard land administration practices.

MapQ • Advanced, user-friendly mapping tool combining proprietary and public data into easy-to-read presentation quality maps.

With all of these software solutions to choose from, it's no wonder Divestco has been named one of the 50 fastest growing companies in Alberta. More and more customers are turning to Divestco software to give them data at their fingertips and the knowledge and expertise that they need. Let Divestco give you the competitive edge we know you are looking for. ***Give us a call at 403.237.9170 or email sales@divestco.com***
