

Innovative World-Class Workflow Solutions

At Energy Navigator Inc. (ENI), their vision is to be recognized as the leading provider of innovative corporate solutions for the Oil and Gas Industry. The private company, which was founded in 1998, is well on its way to achieving this vision in the Canadian upstream oil and gas market. Over 60 companies out of the Top 100 are using one or more of ENI's software solutions. Over 200 companies in Canada are ENI clients. In addition, the company is starting to break into foreign markets with installations in the United States, France, Netherlands and Australia.

One of the keys to ENI's success is the responsive and collaborative approach they take to the on-going development of their solutions.

ENI's mission is clear: To achieve excellence serving the domestic and international Oil and Gas Industry. This is accomplished by providing innovative world class forecasting, valuation and capital tracking workflow solutions to help clients efficiently manage their assets and reach their full potential.

Recognizing that industry needs are constantly changing, ENI makes it their business to understand the needs of their clients. The company's two software solutions: AFE Navigator® and Value Navigator® are continually evolving. Their solutions allow their clients to comply with today's rigorous industry reporting and corporate governance requirements. ENI solutions include built-in audit controls, current royalties, tax regimes, and reporting methodologies.

capital approval and monitoring business processes are modeled into the application. Advanced functionality such as role-based security, tight integration with commercial accounting packages and powerful custom reporting are a result of the years of investment that have gone into the application.

and consolidation are easy to run. Economic reports can be generated very quickly as a result of Value Navigator's unique open architecture and design.

One of the keys to ENI's success is the responsive and collaborative approach they take to the on-going development of their solutions. Clients are engaged in focus groups and discussions on a regular basis to ensure that their requirements are met, and their ideas are incorporated into the products. As a testament of their commitment of meeting their clients' needs, ENI has increased their staff by 30% in the past five months and is looking forward to continuing expansion in the future.

As software integration in the workplace becomes more advanced, Energy Navigator Inc. recognizes the requirement to provide tools that are part of a user's **natural workflow, are easy to learn and use, provide results quickly, and facilitate data sharing** by utilizing an open database platform. They provide software solutions that help you make better business decisions, and will increase your company's efficiency. In addition to providing state-of-the-art software tools, their customers receive the highest possible level of customer service.

A F E Navigator

AFE Navigator® is a comprehensive solution for AFE creation, routing, approval and tracking used by over 70% of Canada's top oil and gas trust companies and several E&P and midstream companies to manage the execution of their capital spending programs. Their clients include two of Canada's largest oil and gas companies, with up to 1,000 named users at each installation.

AFE Navigator® is configurable. The client's

value Navigator

Value Navigator® is a powerful and flexible production forecasting, economic valuation, risk analysis, budgeting and reserve management tool. Many of Canada's largest oil and gas companies are using Value Navigator® to manage and report their year-end reserves. Leading independent engineering firms have integrated Value Navigator® into their workflow. In addition, Canada's largest property brokers are using Value Navigator® to assist with the acquisition and divestment process.

The application has powerful decline, material balance and volumetric forecasting functionality. It can be used for geostatistical modeling to assist with property valuation or rank exploration. The robust, up-to-date economic engine includes Canadian and US royalties, a comprehensive price deck editor and a custom regime editor to model international royalties. Corporate scenarios

- We encourage a **POSITIVE** working environment and a healthy **WORK-LIFE BALANCE**.

TOGETHER WE ACHIEVE THE EXTRAORDINARY!

Plan your approach

Operating in today's highly competitive environment has brought new challenges. You need to be able to react quickly to changing conditions, plan ahead for the future and continuously track your company's progress.

With AFE Navigator[®] and Value Navigator[®], you can quickly and easily access the information you need to stay on course.

AFE Navigator[®] brings a new level of efficiency, control and accountability to capital tracking by automating and streamlining your AFE creation and approval process. The extensive real-time custom reporting utility allows you to manage by exception, address bottlenecks and monitor project status.

Value Navigator[®] gives you control over your reserves, production and cash-flow forecasting. You can quickly create your annual capital and production budget, build your long-term plan and maintain your reserve data — all from a single source.
